

A flight simulator (Airbus A320) with reproduction of most flight phases, alarms and sound effects. The cockpit is actual size.

An aeronautical museum presenting a collection of aircraft including legendary planes such as Concorde, A300B, A380, Blériot XI. Some of the aircraft offer onboard access for filming.

A centre for scientific culture with immersive sets, life-size exhibits and spacecraft, IMAX 3D cinema, planetarium.

A cultural hub celebrating the birth of Toulouse's great aeronautical history on a legendary site. It houses many period objects (uniforms and equipment).

This association preserves and restores a unique collection of aircraft; you can see legendary aircraft in the open air as well as the restoration hangar.

A training centre for aviation professionals, from aeronautical maintenance to training for navigation personnel. All professional equipment is available: cockpit, cabin section, lounge, safety equipment, etc.

An exhibition and convention centre with the appearance of a major international airport, with 90,000 m<sup>2</sup> of varied spaces and architecture inspired by the Airbus assembly plants.

# TOULOUSE [ON AIR]

All your locations,  
from the aircraft to the airport

A number of iconic sites and a film studio have decided to get together in order to promote the destination "Toulouse: Capital of Aeronautics" to professionals from the cinema and audio-visual industries.

The cabin of an aircraft or a cockpit, military and commercial airplanes, an airport, a runway or a hangar... "Toulouse On Air" can grant you access to some unique settings for your next film project.

Ready for  
take-off?

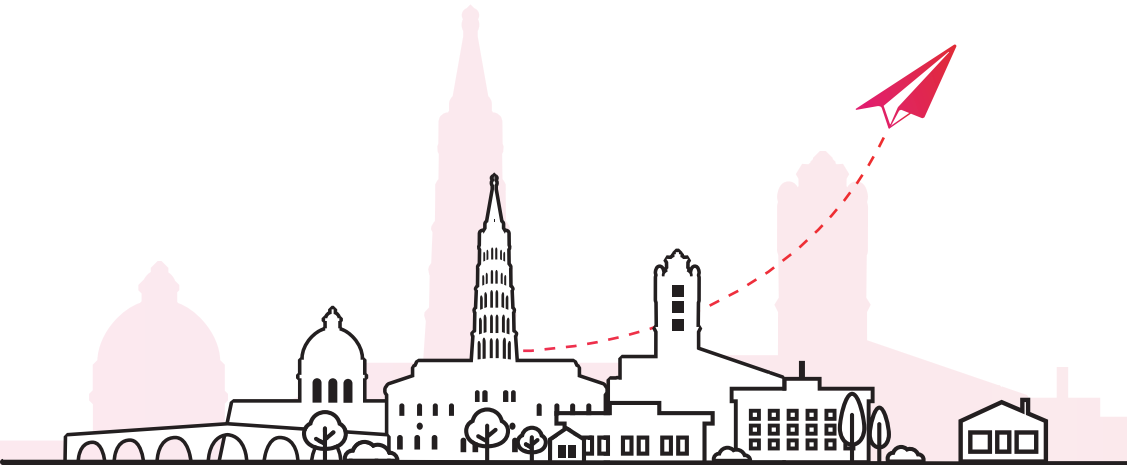

Le Grand Set is a 1,200 m<sup>2</sup> studio with a set featuring the interior of an airplane that is entirely modular, mobile and customized to your specifications. It is made up of a number of different modules that can be configured and personalized to meet your needs.

France's 6th largest airport, Toulouse-Blagnac boasts large, bright spaces and a range of architectural styles depending on the different halls.

This former military airbase and a historic site for French aviation is now a business airport that provides all the necessary infrastructure (control tower, tarmac and hangars, etc.).
